

**Low angle semi dark field ring light
LED
AC-90-240v 50/60 Hz**

Features:

- Illuminated by 30 bright LED bulbs
- Low angle illumination
- Adjustable brightness
- Colour temperature 6000K
- Perfect for placing on DeltaPix's stand bases.
- Made of black anodized aluminum

Area of application

- Surface inspection as scratches, holes.
- 3D Visualizing of textured surface structures,.
- Document inspection.
- Emphasize elevation changes.

Dimensions:

- Outer diameter: 200mm
- Inner diameter: 160mm.
- Height : 40mm
- Weight: 890g

Dark Field Light ring

Dark Field Light ring DF200 is ideally used for testing and checking surfaces, because of their low angle illumination. The "semi" Dark Field Light, makes both defects, surface outlines and back ground appear visible.

The solid construction of the ring light, supports smoothing of creases in documents and papers, without damaging them, due to the soft surface of the bottom of the ring light.

Easy-to-use

Due to it's build in LED's the ring light has no need of an external light source or heavy fiber light connection, and is only connected through a thin cord with level adjustment. So after the ring light has been positioned on the document, it stays there.

Super High Bright Long life LED's

The LED's in the ring light is the newest ultra high bright long life LED's, with an expected lifetime of more than 50.000 hours.
