COOLED Cameras

DeltaPix cooled microscope cameras offer fast and precise high-resolution live video streams as well as still images! User-friendly setup for everyday use, with a first in class price/performance ratio.

The Cooled DPX camera series is especially suited for low light applications, due to its high sensitivity, and applications in which a high frame rate and is required.

The Cooled DPX camera series is based on a high-quality Sony Exmor™ sensor for excellent image quality, sensitivity, speed and build-in advanced two-stage peltier cooling technology cooling up to 42°C below ambient temperature. This will greatly increase the signal to noise ratio and decrease the image noise.

High quality, cost effective and flexible

The Cooled DPX microscope camera series has C-mount interface making them easily and cost efficiently fitted on most standard microscopes.

User-friendly Camera

Plug and play – the USB 3.0 interface provides high speed and ease of installation on any computer.

Typical applications: ✓ Material science ✓ Metrology ✓ Dark Field ✓ Bright Field ✓ Fluorescence ✓ Cytology ✓ Biology
