# RESOLV4K

LENS SERIES

## Greater Throughput

The Resolv4K Lens Series was designed from first order principles to maximize the usage of a sensors with higher pixel densities. Numerous adapter options allow users to employ a range of sensors from 1/2" through APS formats and beyond. On the front end of the zoom lens attachments give users the best of both worlds; the low mag end of zoom gives wide fields of view with no sacrifice in MTF or loss of illumination, while the high mag end delivers microscope objective like resolution at extremely long working distances.

The Resolv4K lens has been designed not only for superior visible wavelength axial color correction, but dramatically increased wavelength focusing ability with Visible through Near Infrared (Vis-NIR) and SWIR options. Larger aperture lens attachments significantly increase the usable FOV for coaxial lighting options.

### Larger Field of View

Navitar's Resolv4K Series offers so much more resolving power, that a 400- 600% larger field of view is possible when compared to traditional zoom imaging, without any loss of detail. No need to stitch together multiple images from multiple captures.

12X Zoom at Low Mag with 2/3" 2MP sensor  
18.4mm

Resolv4K Zoom at Low Mag with 0.5X Lens Attachment and 8.9MP sensor.  
Resolv4K has 2.4X horizontal FOV for 476% more total FOV area covered  
44.2mm

**Note:** Edge spread functions indicate the lens performance of a system by showing how quickly a black to white edge transition is detected by a lens. A 10% to 90% grey level value at the sensor is shown here as indicating a full off to full on.

# & Larger Field of View

## Higher Resolution

Resolv4K's higher NA, along with its superior aberration correction, gives more precise measurement capabilities than ever. Even comparing a 4.5X zoom point to a 7X mag system, the exceptional quality of the Resolv4K design delivers superior performance, as shown in the black to white transitions in the edge spread functions below. System performance holds up all the way to the corner of the sensor, so multiple regions of interest can be set regardless of their location in your FOV. Your edge detection software will notice the difference.

### 12X Zoom

12X Zoom @ 7X High Mag | 2MP Sensor - 0.79 $\mu$ m / pixel | 1.55mm FOV - 1.28 mm<sup>2</sup> Area

### Navitar Resolv4K Zoom

Resolv4K Zoom @ 4.5X High Mag | 8.9MP Sensor - 0.76 $\mu$ m / pixel | 3.56mm FOV - 5.20 mm<sup>2</sup> Area (3.25X more)

**Left:** Zoomed in inset of resolution lines, 0.5 $\mu$ m, 1 $\mu$ m, 2 $\mu$ m, 3 $\mu$ m, 4 $\mu$ m, 6 $\mu$ m, 9 $\mu$ m patterns **Center:** Edge spread function, on axis **Right:** Edge spread function, corner of the sensor

## Expanded Wavelengths

The Resolv4K lens series comes in visible, Vis-NIR and SWIR coating options. The visible options produce superior axial color correction to existing zoom lenses. The Vis-NIR option allows precision surface inspection in the deep blue, while performing sub-surface inspection at 1100nm without refocusing or loss of transmission. Using the SWIR goes even further beneath the surface to see damage and defects in food and silicon wafer inspection, among other applications. SWIR and Vis-NIR options are available for the following part numbers:

32mm Sensor	-	-	-	12.50 - 1.78 mm				

NOTE: Coax and fine focus options all maintain same FOV, resolution, and working distance, subject to adequate lighting

The above fields of view are measured diagonally in millimeters (Horizontal = Diagonal x 0.8 and Vertical = Diagonal x 0.6) on a 4:3 aspect ratio sensor. Dark Gray box: Contact your Navitar sales representative for further guidance when selecting this option.

## Resolv4K Fixed System

The new Resolv4K Fixed system is a combination of the superb optical performance of the Resolv4K Zoom and design principles of our Precise Eye Fixed that is ideal for fixed field of view applications with closer working distances. The Resolv4K Fixed lens offers higher magnification and resolving power than standard enlarging or SLR lenses in macro mode.

- High apertures improve resolving power by 30% at familiar working distances
- Available interface modules allow users to build their system specifically for their needs
- Standard large camera format options
- Compatible with 10MP cameras and beyond
- Built-in rear adapter fine manipulation focus
- Larger focus options with motorization available
- Compatible with Infinity Corrected Objectives
