

**For professionalization and quality assurance of the process from order receipt to delivery, we are looking for a Logistics Manager.**

*We offer:*

- Creative, informal work environment.
- Flat management structure gives all employees great opportunities for influence on almost everything.
- Pleasant premises peacefully located in Smørum with easy access from the entire Greater Copenhagen area
- An attractive salary package with Pension Scheme and Health Insurance
- Possibility of participation in an attractive warrants scheme.
- Possibility of working from home and flexible working hours, so that the family can also be prioritized.

You greatly help shape your everyday life at DeltaPix, but there are probably some fixed points of reference:

- Maybe you arrive by bike like over half of the employees, and need to have a shower and changed into informal office clothes that hang in your wardrobe.
- You may then start with a cup of coffee from our Gourmet coffee machine (there are a few coffee enthusiasts including the employees) before you first get an overview of the day's operational tasks, primarily shipments and purchase of parts for production.
- At 9.00 a.m., we hold a morning meeting where we update each other and coordinate across professional boundaries on important tasks, opportunities, and projects.
- The rest of the day will probably change from day to day, but essential tasks are to introduce and integrate inventory management with our finance program, "e-conomic", as well as introduce processor for quality assurance, so we can increase the delivery volume, without compromising on uniformity and quality. In addition, plenty of other tasks, depending on abilities and interests. Are you e.g. Sharp on IT, there are plenty of IT tasks to take over from employees, where it is less related to the job function. Perhaps you are also interested in occasionally talking to core customers and suppliers about logistics issues, prices etc.

*Professional knowledge, experience and qualities we will appreciate in a new employee:*

- A high degree of determination and focus on opportunities and problem solving.
- Knowledge of "e-conomics" or other similar economics programs
- Inventory management
- Quality assurance
- Technical understanding (preferably understanding of electronics and optics)
- Self-propelled and enterprising

- Experienced PC user and understanding of IT.
- Flexibility and willingness to take on a wide range of tasks, from the simplest to the most complex.
- Have an overview and calm when things are moving fast.
- Good English skills (communication with a vast majority of customers and suppliers takes place in English, in writing and orally).

DeltaPix is a small technology company in growth. DeltaPix develops and delivers advanced microscope technology with a focus on making the latest and most advanced technology available, also for users who do not normally have the funds for the investment or training to operate advanced microscope products. DeltaPix' market is all over the world, and our microscope products are located at many of the world's largest and leading manufacturing companies, universities, research institutions, museums, and hospitals. About 90% of turnover is export.

DeltaPix participates in development projects together with some of Europe's leading companies and research institutions within optics and laser technology, e.g. on the development of the environmentally friendly laser lithography of the future: <https://www.optimal-project.eu/> .

DeltaPix is a responsible company with a high degree of employee involvement. Our mission (see link) is the guiding principle in all significant decisions, daily as well as strategic. DeltaPix is currently undergoing rapid development with great growth, and therefore needs to get even more control over logistics, production management and quality assurance. The employee we are looking for will have great opportunities to influence and shape the structure of the entire process from order receipt to delivery of goods.

We have no preferences for gender, ethnicity, or age, we only value the human qualities and professional skills.

Please send your applications / questions to CEO Steen Ørsted, +45 46760205,
